Matching Game 3x3 Puzzle

This is a more sophisticated form of "concentration" because it includes a self-check and hints on words that the learner doesn't know.

Preparation: Cut out the squares on the dotted lines only (don't cut out the triangles).

Play: match the words to their meanings, placing them together (the edges of their squares touching). Assemble the puzzle into a 3X3 square so that every word touches its definition.

(There are lots of right ways to assemble the puzzle, since the words at the top and bottom of each column and both ends of each row also rhyme.)
